

Zomato Dataset Analysis

Alfido Tech – Data Science Internship | Task 1
Tools: Python • Pandas • Matplotlib • Google Colab

Objective

The objective of this project is to perform Exploratory Data Analysis (EDA) on a Zomato restaurant dataset and identify patterns related to cuisines, cities, restaurant ratings, and prices.

Dataset Overview

- 123,657 records
- 26 columns
- No missing values
- Dataset sourced from Kaggle

Analysis Performed

- Inspected dataset structure and data types
- Checked for missing values
- Generated summary statistics
- Analyzed the most common cuisines
- Analyzed cities with the highest number of records
- Studied restaurant rating distribution
- Examined price versus average rating

Key Findings

- Beverages was the most represented category with **39,441 records**.
- Hyderabad had the highest number of records with **15,613**.
- Restaurant ratings ranged from **3.0 to 4.65**, with an average of approximately **3.89**.
- The average listed price was approximately **₹241.38**.
- Listed prices ranged from approximately **₹0.95 to ₹12,024**.

Notebook & Repository

GitHub Repository: [Alfido-Tech-Internship](#)
Notebook: [Alfido_Zomato_Data_Analysis.ipynb](#)

Conclusion

The analysis provides useful insights into restaurant categories, geographical distribution, ratings, and pricing. The visualizations make the patterns in the dataset easier to understand and provide a foundation for further restaurant and customer analysis.

Task 1 – Visual Analysis

Key visualizations from the completed Zomato EDA. The first two charts reproduce the exact category and city counts from the notebook; the rating and price charts summarize the exact minimum, average, and maximum values calculated during EDA.

Insight: Beverages is the most represented category, followed by Pizza, Fast Food, and Desserts.

Insight: Hyderabad has the highest number of records, followed by Jaipur and Mumbai.

Ratings & Pricing Analysis

Rating insight: Restaurant ratings range from 3.0 to 4.65, with an average of approximately 3.89.

Pricing insight: The average listed price is approximately ₹241.38, while the observed range is approximately ₹0.95 to ₹12,024.

Note: The original notebook also contains the price-versus-average-rating scatter plot and the full EDA outputs. This report complements the notebook with the required summary, visual evidence, and direct notebook/repository links.
